Professional Summary

Senior Frontend / Full-Stack Engineer with **5+ years** in enterprise healthcare and e-commerce web apps. At **PharmaBits** (EU pharmacy workflow software): deep Angular (13–19), RxJS, NgRx; increasing ASP.NET Core / EF Core collaboration. Sets the technical bar for FE delivery (merges, reviews) while contributing to backend implementations—IC scope, not team lead. Modern **AI-assisted workflow** (Cursor, Claude Code, Codex, agent/MCP-based tooling) is part of day-to-day engineering: refactors, reviews, test generation, and debugging at higher throughput—without compromising correctness or code review discipline. Delivers tested, high-performance UIs.

Work Experience

Senior Frontend / Full-Stack Developer **Sep 2022 – Present**
PharmaBits • Pharmacy workflow software (EU); formerly BlueBitSoft

- *APL (Apoteek Logistiek):* Modular Angular for inventory/prescription flows (NgRx, standalone components, lazy loading)
- *Full-stack:* Collaboration on ASP.NET Core features/endpoints/modeling; repository-style access for regulated workflows
- *Frontend discipline:* Merge readiness, reviews, shared conventions across FE projects (IC; not people-manager)
- *Maps:* Leaflet.js at 10,000+ markers; RxJS chunking and efficient updates
- *Quality:* 300+ Jasmine/Karma & Cypress tests; 80%+ coverage on critical modules
- *AI-assisted workflow:* Daily use of Cursor, Claude Code, and Codex agents for targeted refactors, code review, test scaffolding, and faster onboarding to unfamiliar areas

Technologies: Angular 13–19, RxJS, NgRx, ASP.NET Core, Leaflet.js, Cypress, Jasmine, Karma; Cursor, Claude Code, Codex (AI workflow)

PWA & E-Commerce Developer **Dec 2021 – Sep 2022**
Ketab.ir • *BazarKetab* • Digital Publishing

- Angular+Ionic PWA: offline sync, service workers, push notifications
- Vendor tooling in NX Monorepo for catalog/inventory maintenance

Technologies: Angular, Ionic, PWA, NX Monorepo, TypeScript, Service Workers

Frontend Developer **Mar 2020 – Feb 2021**
Zagros System • Software House

- Responsive UIs with React.js and ES6+
- Client projects in an agency-style software house

Technologies: React.js, JavaScript (ES6+), HTML5, CSS3, Git

Technical Skills

Frontend: Angular 13–19 (primary), React, Next.js, Ionic; RxJS, NgRx, Zustand, Redux Toolkit
Architecture: NX, Module Federation, standalone components, lazy loading
UI: Tailwind, Sass/SCSS, Angular Material, PrimeNG
Backend: .NET 8/9, ASP.NET Core, C#; EF Core (Code First), SQL Server; Clean Architecture, REST, JWT, Identity
Tools: Swagger, Postman, Docker
Testing: Cypress, Jasmine/Karma, MS Test
DevOps: Git, CI/CD, Vite, Webpack; macOS (M4 workflow)
AI workflow: Cursor, Claude Code, Codex/GPT, AI agents & MCP-based tools, prompt-driven refactors, AI-assisted code review and test generation, structured "skills/superpowers" workflows

Core Strengths

M.Sc.-level systems thinking applied to software structure; macOS/Git-centric workflow with deep AI-assisted tooling (Cursor, Claude Code, Codex, agent/MCP); SOLID, DRY, maintainable design; comfort owning code across the stack.

Education

M.Sc. Mechanical Engineering (Mechatronics) **2022**
Isfahan University of Technology
Thesis: AI-Based Predictive Control using ML for Dynamic Systems

B.Sc. Biosystems Mechanical Engineering **2019**
Razi University

Featured Full-Stack Projects

Todo.Backend (Microsoft To-Do Clone)
Clean Architecture in .NET Core; JWT; EF Core migrations; reactive frontend.
github.com/rasoulveisi/Todo.Backend

Healthcare OT Evaluation System
HIPAA-compliant occupational therapy system; dynamic reactive forms (Angular 19).
github.com/rasoulveisi/HealthcareOT-EvaluationSystem
